The Project

The Melbourne Metro Rail Project ('the Project') includes the following key components:

- Twin 9 kilometre rail tunnels between Kensington and South Yarra, following the alignment of Swanston Street through Melbourne's Central Business District (CBD) and linking the existing Sunbury and Cranbourne / Pakenham railway lines.
- New CBD North and CBD South stations providing direct interchange with Melbourne Central and Flinders Street stations respectively.
- New stations at Arden, Parkville and Domain, with a new train/tram interchange at Domain.
- Train turnback facility at West Footscray.

The EES

The Victorian Minister for Planning determined on 3 September 2015, that an EES is required for the Project under the *Environment Effects Act 1978*. The EES process will inform decision-making on the Project under Victorian law. Further information regarding the EES process can be found on the Department of Environment, Land, Water and Planning website at delwp.vic.gov.au.
