Dear Greta,

While I have not managed to track down who one of letters went to in our business, I can confirm that Viva Energy will make a submission on this matter and would welcome any opportunities to be involved in any of the processes, workshops, etc. that the committee runs.

Overall we believe this review is a positive development and comes on the back of discussions we have held with the Department of Planning dating back from 2012 where we were becoming increasingly concerned around the increase in development applications received at our Newport Terminal and the associated risk and encroachment issues these would cause if approved. It also fits with commitments that the Andrew's Government made at the election to conduct "An urban planning inquiry into regulations for neighbourhoods near Major Hazard Facilities 'to preserve resident's safety while allowing industries to operate and grow".

Be believe that the outcome of the committee's work could have the potential to help in the longer term with local councils and also in dealing with the constant stream of development applications we deal with around Newport Terminal and more recently around Geelong Refinery.

I look forward to the next stage of the process.

Kind Regards,
 Edwina
