**Comments:** I'm a concerned resident [REDACTED] in Newport. While I agree with the need for a tunnel, I'm flabbergasted that the residents of Francis Street Yarraville have acquired such power that they have managed to have their industrially zoned streets left alone by the new tunnel project, and residential streets in Newport are now going to be affected by increased truck traffic. Air quality and road safety are at risk. Quiet streets will be overloaded by traffic, and the surrounding roads are not capable of handling increased traffic as they stand. I have serious concerns about how the Hall St Spotswood exit ramp will impact on residential streets that flow from it, and fear kindergarten and pedestrian traffic will be at greater risk. I'd like to ensure the existing residential streets of Newport are not impacted by the shift of tunnel design from Yarraville to Newport, and receive assurances that traffic is diverted away from residents who purchased properties in good faith in residential areas will be protected, instead of sacrificing the safety and quality of life in Newport for the vocal residents of industrially-zoned Yarraville. Kind regards, Sarah.
