MHF007

Do you wish to be heard? **No**

Full name	Mark Marsden
Name of organisation:	Moreland City Council
Postal address	90 Bell Street Coburg Vic 3058
Address Affected	
Comments	<p>Council's comments are confined to Pipelines.</p> <p>In November 2015 Council was approached by ExxonMobil with a request that any proposals for buildings and works within a certain distance of Licensed Pipelines #118 (Somerton) and #119 (Tullamarine) - which both carry JetA1 fuel - be referred to ExxonMobil for comment. They were willing to provide GIS Coordinates so that Council could upload the location of the two pipelines on its GIS system. Council officers advised that Council was not willing to adopt a formal referral process with ExxonMobil due to uncertainties regarding liability, however suggested they approach the Department of Environment, Water, Environment and Planning to seek a State-wide approach to this matter.</p> <p>Council supports a risk-based spatial overlay for licensed pipelines such as the two that exist in the Moreland municipality as a potential tool for the trigger of a referral to prescribed bodies for buildings and works applications within a nominated distance from the pipelines. Should this suggestion be accepted, further discussion would need to occur in relation to the nature of information to upload on GIS system, the extent of the overlay and whether there would be exemptions from certain buildings and works from needing a referral.</p>
