

Notes: Other areas contain significant environmental assets that should be considered in detail through any finer scale planning. Natural hazards should be considered through finer scale planning, as not all areas of hazard are identified on the map.

Avoid or minimise the impact of development on high value environmental and cultural heritage assets, including significant landscapes.

Enable the establishment, protection and reconnection of terrestrial habitat through large-scale native vegetation corridor projects.

Manage growth to help maintain the health of water supply catchments.

Manage risks to settlement growth from natural hazards.

Encourage the sustainable expansion of cultural heritage tourism.

- Settlement
- Freeways and highways
- LGA Name** Local government areas within the Goldfields Heritage Region
- Significant landscape: State ⁽¹⁾
- Significant landscape: Regional ⁽¹⁾
- ▨ Areas containing high value terrestrial habitat ⁽²⁾
- Public land
- ▨ Declared water supply catchment
- Regionally significant wetlands
- Rivers
- ▲ Urban flood considerations ⁽³⁾
- ▲ Urban bushfire considerations ⁽⁴⁾
- ▲ Urban salinity considerations ⁽³⁾

(1) South West Landscape Assessment Study (draft areas subject to change)
 (2) Represents the three highest levels of NaturePrint strategic natural values
 (3) Urban flood and urban salinity considerations are based on existing overlays
 (4) Bushfire considerations may be based on one or more of the following: existing overlays, advice from CFA or Regional Bushfire Planning Assessments. Does not include Bushfire Prone Areas.
