Schedule of planned activities

A planned approach that aligns with the project development phases guides stakeholder engagement and consultation for the proposed Hexham Wind Farm. The project is currently in the environmental and planning approvals phase and key project milestones include public exhibition of draft EES Scoping Requirements and commencement of EES assessments.

Consultation activities planned from April to June will inform stakeholders on project milestones and the public comment process led by the Department of Transport and Planning (DTP). Feedback will also be gathered to gain insights into project sentiment and key areas of concern for the local community.

This document provides a schedule of activity planned for Q2 2023. Activities and timing may change based on ongoing stakeholder feedback and project progress.

April 2023

<i>Activity</i>	<i>Details</i>	<i>Stakeholder</i>	<i>Engagement purpose</i>	<i>Proposed timing</i>
