4.0 DESCRIPTORS

Taxon: Botanical name of tree.

Common Name: Accepted common name of taxon

Sources for Taxon and Common Names:

Flora of Victoria online (<https://vicflora.rbg.vic.gov.au/>)

Horticultural Flora of South Eastern Australia (Vols. 1-5)

Origin:

Indigenous	Naturally occurring taxon within locale. Considered Native under planning scheme provisions
Victoria	Naturally occurring taxon within Victoria. Considered Native under planning scheme provisions
Australia	Australian native. Occurs naturally within Australia, but outside Victoria.
Exotic.	Introduced taxon to Australia.

DBH: Diameter at breast height (1.4m), in centimetres.

DAB: Diameter of trunk immediately above root buttress, in centimetres.

Height: Height of tree, in metres.

Width: Estimated width of tree, in metres.

AS TPZ: Tree Protection Zone calculated in accordance with AS4970-2009 *Protection of Trees on Development Sites*.

AS SRZ: Structural Root Zone calculated in accordance with AS4970-2009 *Protection of Trees on Development Sites*.

WH TPZ: Tree Protection Zone calculated in accordance with City of Whittlesea *Standard Detail SDL.2.01 – Tree Protection Zone*

Form Shape of tree crown

Age

Juvenile: Young, recently planted tree.

Semi-mature: Tree is developing and established.

Mature: Specimen has reached expected size in current situation, limited extension growth.

Over-mature: Specimen entering stage of decline, declining health.

Senescent Tree is in advancing decline.

Health

Good: Optimal vigour for this taxon. Crown full with good density, foliage entire, with good colour, minimal or no pathogen damage. Good growth indicators, e.g. extension growth. No or minimal canopy dieback. Good wound-wood and callus formation.

Fair: Tree is exhibiting one or more of the following:

Tree has <30% deadwood. Or can have minor canopy dieback. Foliage generally with good colour, some discolouration may

be present, minor pathogen damage present. Typical growth indicators, e.g. extension growth, leaf size, canopy density for species in location may be slightly abnormal.

Poor: Tree has >30% deadwood. Canopy dieback present. Discoloured or distorted leaves and/or excessive epicormic re-growth. Pathogen is present and/or stress symptoms that could lead to or are contributing to the decline of tree.

Dead: Tree is dead.

Structure

Good: Optimal structure for this taxon. Sound branch attachment and/or no minor structural defects. Trunk and scaffold branches sound or only minor damage. Good trunk and scaffold branch taper. No branch over extension. No damage to structural roots, good buttressing present. No obvious root pests or diseases.

Fair: Some minor structural defects and/or minimal damage to trunk. Bark missing. Cavities could be present. Minimal or no damage to structural roots. Typical structure for species.

Poor: Major structural defects and/or trunk damaged and/or missing bark. Large cavities and/or girdling or damaged roots that are problematic.

Useful Life Expectancy (ULE)

The length of time a tree can be maintained as a useful amenity specimen. Contingent on a number of factors including expected life-span of the taxon, health and structure, pest and diseases, weed status.

Arboricultural Value

None A tree in irreversible decline.

Self-sown environmental weed. Declared noxious weed.

Low Small tree of little contribution to the landscape. Tree with limited useful life expectancy (< 10 years) due to compromised health and/or structure.

Moderate Developing tree yet to achieve fully mature proportions but contributes to the immediate landscape and with a long, potential useful life expectancy of more than 20 years.

Mature and over-mature specimens with reduced health and/or structural ratings that limit the useful life expectancy to less than 20 years.

High A well-established semi-mature, mature or over-mature tree with a strong contribution to the landscape, in overall fair-good condition, with a useful life expectancy of more than 20 years.

Very High A notable example of a taxon for cultural heritage or environmental values, potentially individually protected under a planning scheme control, significant tree or heritage register.
