

- Settlement
- () Improved future transport links such as bypasses and river crossings
- Highway
- Arterial road
- Active freight rail line
- Active freight and passenger rail line
- Active passenger rail station
- ✈ Airport

Safe, reliable and resilient network
Continued planning and infrastructure investment in highways, local roads and rail are required to ensure passenger and freight demand can be met.

Technological advancements
The rollout of the NBN and use of new technological devices may mean that work patterns change and this may negate the need to travel every day to work as people work from home using the new technology.

Amenity and useability
Loddon Mallee North is an attractive region for visitors and ensuring they have the necessary facilities to assist them on their journey will ensure the region remains attractive into the future.
