Schedule of planned activities

Community and stakeholder engagement and consultation for the proposed Hexham Wind Farm is guided by the project development phases and the EES Consultation Plan. The project is currently in the environmental and planning approvals phase and key upcoming project milestones include public exhibition of draft EES Scoping Requirements and progress of EES assessments.

Consultation activities planned from July to September will inform stakeholders on project milestones and the public comment process led by the Department of Transport and Planning (DTP). Feedback will also be gathered to gain insights into project sentiment and key areas of concern for the local community.

This document provides a schedule of activity planned for Q3 2023. Activities and timing may change based on ongoing stakeholder feedback and project progress.

July 2023
