

Melbourne

Urban Vegetation Cover: 2018

Inner South East Region

Environment,
Land, Water
and Planning

Date: 19/6/2019

Project: Metropolitan monitoring and analysis of vegetation cover, heat and land use

Client: Department of Environment, Land, Water and Planning, Victorian Government

Report: Melbourne Vegetation Cover 2018, Inner South East Region

Project Team:

Associate Professor Joe Hurley, RMIT University

Mr Alex Saunders, University of Western Australia

Associate Professor Marco Amati, RMIT University

Dr Bryan Boruff, University of Western Australia

Dr Alan Both, RMIT University

Dr Chayn Sun, RMIT University

Dr Peter Caccetta, CSIRO Data 61

Dr John Duncan, University of Western Australia

Vegetation Cover and Tree Canopy (2018)

Inner South East Region - Urban and Non-urban Areas

Tree Canopy Cover by LGA (%)

Vegetation by Land Use (ha)

Vegetation - Yield by Land Use (%)

Notes:

- Analysis based on the 2018 data capture (limited to features where data coverage is greater than 90%).
- Mesh Blocks classified as "other" are representative of land uses which could not be easily placed in one of the other nine categories due to the nature of the land use, or due to evidence of high mixed use.
- The inner and Inner South East Regions have no non-urban areas.

Melbourne Metropolitan Region

Vegetation and Tree Canopy (2018)

Highlights

High percentage of total vegetation on residential land (55.9% compared with 17.5% for the whole metropolitan region).

High percentage of total vegetation on linear infrastructure (19.1% compared with 7% for the whole metropolitan region).

High percentage of tree canopy on residential land (55.8% compared with 20.6% for the whole metropolitan region).

High percentage of tree canopy on linear infrastructure (25.6% compared with 10% for the whole metropolitan region).

High percentage of total vegetation on residential and parkland collectively (77.4% compared with 33.4% for the whole metropolitan region).

High percentage of tree canopy on residential and parkland collectively (71% compared with 40.7% for the whole metropolitan region).

Low total vegetation yield on commercial land (7.6% compared with 22.3% for the whole metropolitan region).

Low total vegetation yield on industrial land (9.6% compared with 28% for the whole metropolitan region).

High percentage of total vegetation on parkland (21.5% compared with 16% for the whole metropolitan region).
