Comments: This whole thing is very frustrating. It has gone on long enough. Lack of long term planning and really putting the interests of people as top priority but instead going for short term political gain. The West has copped enough. It is time to put rail - extra, and freight on rail. The truck companies have too much power. We cannot have these people's health put on the line any longer. It's logical, common sense what needs to be done so that people's health is not further disadvantaged. Please be brave and forward thinking. Kind regards, Bev Cowan
