

Amenity and useability
Loddon Mallee South is an attractive region for visitors. Ensuring they have the necessary facilities to assist them on their journey to the region will ensure the region remains attractive into the future.

Technological advancements
Bendigo's service sector economy can be strengthened by the rollout of the NBN and use of other technologies and applications.

Transport network capacity
Strategically direct growth to locations with good existing infrastructure and infrastructure with the capacity for enhancement.

Freight and logistics precincts
Develop freight and logistics precincts and associated transport corridors for capacity enhancement and to minimise conflict with urban uses.

- Settlement
- Freeways and highways
- Arterial road
- Active freight rail line
- Active freight and passenger rail line
- Active passenger rail line
- Active passenger rail station
- ✕ Airport
- ✕ Aerodrome

Access and connectivity
As the region grows, attracting people from within and outside the region to its key services and facilities will be crucial. Improving and modifying the network of public transport services to better meet market needs will assist.

Supply chains
In order to ensure that products can reach key markets and access new market opportunities, an understanding of industry needs and freight movements will be required and associated facilities provided to ensure this access.

Safe, reliable and resilient network
The transport network is crucial for the economic development and settlement of the population within the region. Ensuring that there is a safe, reliable and resilient network that is well maintained and able to stand up to major disruption will be a requirement in the future.
