

All consultation with Project Stakeholders (as at 10/04/2019)

GB Energy is committed to an open and transparent consultation process with stakeholders, providing accurate and timely information as it progresses through the various phases of the Project's regulatory approval. This process commenced in late October 2018, with GB Energy starting its engagement program to advise and inform the local community, and other key stakeholder, about the Project.

Environment Plan for preliminary offshore work. Initial focus of the consultation program was on the development of an Environmental Plan to support a proposed offshore geo-physical-geotechnical program on the Golden Beach field. This plan was approved by the Regulator in January 2019 and was revised to include works associated with the near shore pipeline route. This approval of the revised EP is imminent.

In January 2019 the Project also secured ministerial approval for its Pipeline Consultation Plan for the 20km pipeline from the beach through to Longford.

All landowners along the route were provided with copies of the Plan and Notice of Intent and Consent documentation.

Briefing were also held with key regulatory and other agencies including DELWP, Parks Victoria, Wellington Shire, GLaWAC and other key land holders.

In both initial engagement programs, face-to-face meetings with key stakeholders and the provision of project information were the primary form of interface. Updates and an 1800 community information line are used to deal with inquiry.

Media interviews with ABC radio and a briefing of the Gippsland Times were also undertaken to provide background information on the project and its plans and to also encourage local people to attend the Project's first community briefing in Golden Beach on December 8.

This was also supported by advertisements (November 23, 27) in the Gippsland Times encouraging interested parties to the December 8 meeting. Meeting flyers were also distributed to community organisations and interest groups.

Community meetings:

Following the initial December 8 meeting a further meeting was held at Golden Beach on March 2 and another is planned for May 25th. This meeting was re-scheduled due to the calling of the Federal Election. The Project is committed to hold community meetings on an 8-10 week cycle or prior to major work-program activities. We continue to monitor the frequency of the meetings with community leaders.
