

Making it easier to build a small second home

It's now so much easier for Victorians to build small second homes. Our communities can now stay closer to the ones they love, in the suburbs, towns, and regional places across our great state.

We all know that finding the right type of housing in the right location is getting harder and more expensive. That's why the Victorian Government's *Housing Statement – The decade ahead 2024-2034* sets out a plan to deliver significantly more housing that better meets the needs of our wonderfully diverse community. Making it easier to build a small second home is an important part of this plan.

Until now, it's been too hard to build a modestly sized second home. Small second homes had to go through the same planning process as large second homes and other multi-dwelling developments.

We've changed all that. Now, a small second home up to 60 square metres can be built through a quick and easy process without a planning permit. Better still - anyone can live there – family, friends or it can even be rented out to provide extra income to help with the increasing cost of living.

These changes mean families and communities can stay together and connected. More people will have access to affordable housing choices in the areas they want to live, close to jobs, services, public transport, education, and healthcare. It also means we're better equipped to adapt to the changing way we live, with smaller families and single person households becoming more common.

Keeping our neighbourhoods liveable is as important as ever – that's why siting, design and amenity requirements will apply to small second homes. You won't need a planning permit in a heritage or neighbourhood character area either, opening up the opportunity for even more Victorians to benefit from this reform. But to make sure we're keeping everyone safe, a planning permit will be required in areas where there are potential bushfire or flooding hazards.

Small second homes will provide even more housing choices for Victorians, making our state an even better place to live.

**Making it easier
to build a small second home**

Small second dwellings – key characteristics

-  Floor area must be 60sqm or less
-  Must be on the same lot as an existing home
-  Must be only one small second home on a lot
-  Must have a kitchen, bathroom and toilet
-  No car parking spaces required
-  Anyone can live in it or rent it out
-  Must not be subdivided from the main home
-  Must not be connected to a reticulated natural gas supply
-  Siting, design and amenity requirements apply, including minimum garden area

Small second home must be 60sqm or less

Ensure access to the second home from the main home

Small second homes can be built anywhere in residential and rural zones

Residential zones

Rural zones

Small front setback

Private open space, can be shared or separate

Existing home must already be on the lot

How can you build in Victoria

When is a planning permit required in a zone?

- **Not required** in a residential zone if the lot is 300sqm or more
- **Not required** in the Farming Zone, Rural Activity Zone and Rural Living Zone if specified requirements are met
- Planning permit may be required in other zones

When is a planning permit required in an overlay?

- **Not required** in a Heritage Overlay, Design and Development Overlay or Neighbourhood Character Overlay if specified requirements are met, including building height less than 5m and finished in muted colours
- Planning permit may be required in other overlays

When is a building permit required?

- **Always required** for a small second home
